Business Employment Dynamics in Alabama – Second Quarter 2018

From March 2018 to June 2018, gross job gains in private-sector establishments in Alabama totaled 92,414, while gross job losses numbered 91,229, the U.S. Bureau of Labor Statistics reported today. Regional Commissioner Janet S. Rankin noted that the difference between the number of gross job gains and the number of gross job losses yielded a net employment gain of 1,185 jobs in the private sector during the second quarter of 2018. During the previous quarter, gross job gains exceeded gross job losses by 10,809.

The change in the number of jobs over time is the net result of increases and decreases in employment that occur at all private businesses in the economy. Business Employment Dynamics (BED) statistics track these changes in employment at private-sector establishments from the third month of one quarter to the third month of the next. The difference between the number of gross job gains and the number of gross job losses is the net change in employment. (See [Technical Note](#).)

The 92,414 gross job gains in June 2018 followed the 95,408 gross job gains in March 2018. With two exceptions, Alabama's gross job gains have been between 90,000 and 100,000 each quarter since the second quarter of 2015. (See [chart 1](#).) Alabama's gross job losses numbered 91,229 in the second quarter of 2018, lower than the recent peak of 91,407 gross job losses in September 2017.

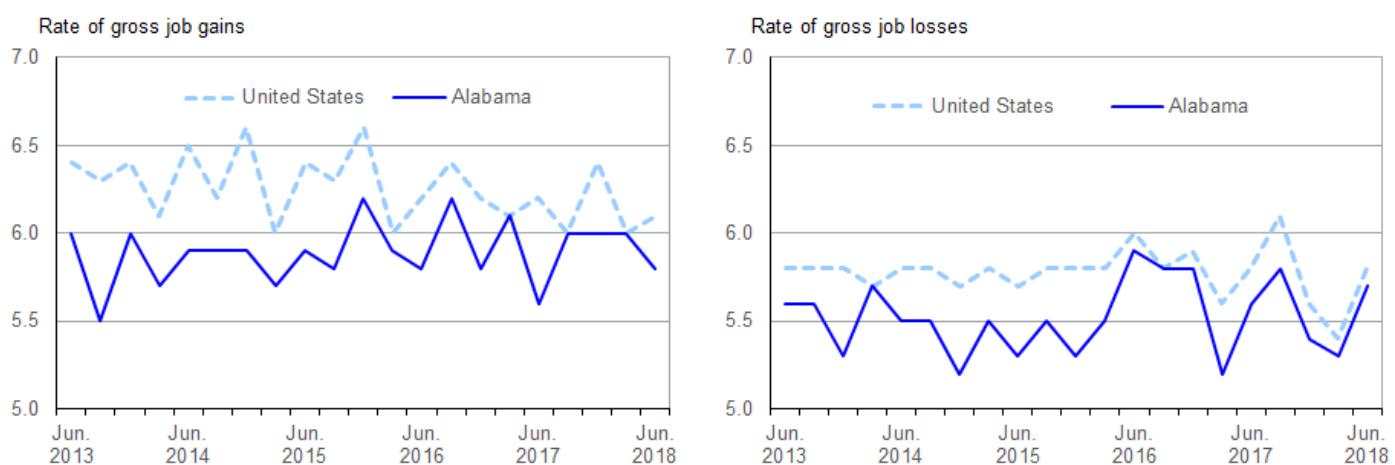

Chart 1. Private sector gross job gains and losses in Alabama, June 2013–June 2018, seasonally adjusted

Source: U.S. Bureau of Labor Statistics.

Alabama's rate of gross job gains as a percent of private sector employment was 5.8 percent in the second quarter of 2018; nationally gross job gains accounted for 6.1 percent of private sector employment. (See chart 2.) Gross job losses represented 5.7 percent of private sector employment in Alabama, while nationally gross job losses accounted for 5.8 percent of private sector employment in the second quarter of 2018.

Chart 2. Private sector gross job gains and losses as a percent of employment, United States and Alabama, June 2013–June 2018, seasonally adjusted

Source: U.S. Bureau of Labor Statistics.

During the second quarter of 2018, gross job gains exceeded gross job losses in 6 of the 10 industry sectors in Alabama. For example, education and health services added nearly 11,700 jobs in opening and expanding establishments, and lost more than 9,300 jobs in closing and contracting establishments. The resulting net gain of 2,316 jobs was the largest of any sector in the state for the second quarter of 2018. Among the five other

sectors with net employment gains, the professional and business services sector had a net gain of over 600 jobs in the second quarter of 2018; the remaining four sectors had net gross job gains exceed gross losses by less than 500.

In contrast, gross job losses exceeded gross job gains in four industries in Alabama. Retail trade lost approximately 14,800 jobs in closing and contracting establishments, and added nearly 13,600 jobs in opening and expanding establishments. The resulting net loss of 1,266 jobs was the largest of any sector in the state for the second quarter of 2018. Net losses in the remaining three industries were less than 750. (See [table 1](#).)

Alabama was among the four states in the East South Central Census Division. In the second quarter of 2018, Alabama, Kentucky, and Tennessee had gross job gains that exceeded gross job losses. (See [table A](#).) All four states in the division had rates of gross job gains that were below the 6.1-percent national rate. Alabama was among the three states in the division that had rates of gross job losses that were below the 5.8-percent national rate. Mississippi had a rate of job loss above the national rate.

Table A. Private sector gross job gains and losses for the United States, East South Central Division, and East South Central states, June 2018, seasonally adjusted

Area	Gross job gains		Gross job losses		Net change	Net change as a percent of total employment
	Total	As a percent of total employment	Total	As a percent of total employment		
United States.....	7,639,000	6.1	7,202,000	5.8	437,000	0.3
East South Central (1).....	378,597	—	366,281	—	12,316	—
Alabama.....	92,414	5.8	91,229	5.7	1,185	0.1

Tennessee.....	140,227	5.5	132,038	5.1	8,189	0.4

Footnotes:

(1) Data were calculated for this release using published gross job gains and gross job losses for states located in the East South Central Census Division.

Note: Dash indicates data not available.

Additional statistics and other information

BED data for the states have been included in [table 2](#) of this release. For more information on the Business Employment Dynamics data, visit the BED web site at www.bls.gov/bdm/.

The Business Employment Dynamics for Third Quarter 2018 are scheduled to be released on Wednesday, April 24, 2019.

Technical Note

The Business Employment Dynamics (BED) data are a product of a federal-state cooperative program known as Quarterly Census of Employment and Wages (QCEW). The BED data are compiled by the U.S. Bureau of Labor Statistics (BLS) from existing QCEW records. Most employers in the U.S. are required to file quarterly reports on the employment and wages of workers covered by unemployment insurance (UI) laws, and to pay quarterly UI taxes. The QCEW is based largely on quarterly UI reports which are sent by businesses to the State Workforce Agencies (SWAs). These UI reports are supplemented by two additional BLS data collections to render administrative data into economic statistics. Together these data comprise the QCEW and form the basis of the Bureau's establishment universe sampling frame.

In the BED program, the QCEW records are linked across quarters to provide a longitudinal history for each establishment. The linkage process allows the tracking of net employment changes at the establishment level, which in turn allows the estimation of jobs gained at opening and expanding establishments and jobs lost at closing and contracting establishments.

The change in the number of jobs over time is the net result of increases and decreases in employment that occur at all businesses in the economy. BED statistics track these changes in employment at private business establishments from the third month of one quarter to the third month of the next. Gross job gains are the sum of increases in employment from expansions at existing establishments and the addition of new jobs at opening establishments. Gross job losses are the result of contractions in employment at existing establishments and the loss of jobs at closing establishments. The difference between the number of gross jobs gained and the number of gross jobs lost is the net change in employment.

Gross job gains and gross job losses are expressed as rates by dividing their levels by the average of employment in the current and previous quarters. The rates are calculated for the components of gross job gains and gross job losses and then summed to form their respective totals. These rates can be added and subtracted just as their levels can. For instance, the difference between the gross job gains rate and the gross job losses rate is the net growth rate.

The formal definitions of employment changes are as follows:

Openings. These are either establishments with positive third month employment for the first time in the current quarter, with no links to the prior quarter, or with positive third month employment in the current quarter following zero employment in the previous quarter.

Expansions. These are establishments with positive employment in the third month in both the previous and current quarters, with a net increase in employment over this period.

Closings. These are either establishments with positive third month employment in the previous quarter, with no employment or zero employment reported in the current quarter.

Contractions. These are establishments with positive employment in the third month in both the previous and current quarters, with a net decrease in employment over this period.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.
